11:30 to 12:15	Macrophyte Sampling and Identification
12:15 to 12:45	<i>Lunch – Provided by FWP</i>
12:45 to 1:00	Sample Collection, Preservation, Voucher Samples
1:00 to 1:15	Mobile Data Collection and Data Sheets
1:15 to 1:30	Gear Decontamination
1:30 to 3:30	Lentic Sampling – Fort Peck Dredge Cuts
3:30 to 5:00	Lotic Sampling – Missouri River
5:00	Adjourn

Things to bring:

- Water bottle
- Sunscreen
- Hat
- Magnifying lens or loupe if you have one (I'll have some available but not enough for the whole group)
- Field clothes - There is a field portion of this workshop so it is expected participants will get wet and dirty. It is advisable to wear clothing suitable for field work. It is encouraged to bring waders if you have them so you can get in the water to sample, but at a minimum rubber boots. You are welcome to wet wade as well.
- Excitement to learn about sampling for AIS!

Sampling gear will be provided for the class so no need to bring any nets or plant rakes.

THE **OUTSIDE** IS IN US ALL.
